SUMMARY

Software Engineer with 2+ years of experience designing, developing, deploying, and supporting enterprise integrations and full stack applications. Experienced in C#, .NET, Java, JavaScript, React.js, Node.js, SQL Server, Dynamics 365, Box, and OpenText Documentum. Hands-on experience designing integration architecture, developing REST APIs and plugins, implementing SSO/RBAC and encrypted configuration, optimizing data retrieval, solving complex document-processing problems, performing functional and integration testing, and managing production deployments and support.

EXPERIENCE

Software Engineer — *Reva Info Lab Solutions Pvt. Ltd.* | *2024 – 2026*

- Engineered, deployed, and supported enterprise integrations across Dynamics 365, Box, and OpenText Documentum using C#, .NET REST APIs, plugins, web resources, and platform configuration, supporting end-to-end integration workflows from development through production.
- Redesigned backend user synchronization by replacing API-based retrieval with direct SQL processing, reducing synchronization time by **40%**, while improving reliability and reducing API dependency.
- Implemented OTDS/SSO authentication, role-based access controls, and encrypted configuration/data handling, strengthening authentication, authorization, and secure configuration across enterprise integration workflows.
- Owned deployment and environment setup for integrations, including IIS configuration, solution and assembly/plugin registration, configuration updates, and production validation; investigated and resolved deployment and runtime issues across environments.
- Performed functional and integration testing across authentication, document workflows, configurations, and migration scenarios using Postman; reproduced defects, validated fixes, and performed end-to-end API workflow validation before production deployment.
- Collaborated with customers and internal teams to demonstrate integration workflows, clarify requirements, gather feedback, and implement requested changes.
- Created technical documentation covering integration configuration, deployment procedures, workflows, and troubleshooting steps, supporting repeatable implementation, production maintenance, and knowledge transfer.

SELECTED ENGINEERING PROJECTS

Dynamics 365–Box Integration Suite | *C#, .NET, JavaScript, REST APIs, Box SDK*

- Developed and integrated custom React/JavaScript web resources, C# plugins, and REST APIs in Dynamics 365 to automate document-management workflows and connect enterprise document services end to end.
- Implemented Box Sign integration and dynamic folder-permission handling; delivered client demonstrations, incorporated feedback, and validated end-to-end workflows.

TCCI Document & Annotation Migration Engine | *Java, FileNet APIs, ImageIO*

- Designed and implemented an annotation-conversion framework supporting 10 annotation types across 3 document formats (PDF, TIFF, and multipage TIFF), with reusable conversion logic for cross-format document migration.
- Resolved complex annotation rendering and alignment issues using dynamic DPI scaling, page-extents mapping, coordinate transformation, rotation handling, and annotation validation; integrated IV APIs to reduce hardcoded processing logic.

Aspireo — Full Stack Project Management App | *React, Redux, Node.js, Express, MongoDB, WebSockets*

- Developed project-management UI components with React and Redux and backend APIs with Express and MongoDB, implementing persistent application data, API-driven workflows, and CRUD functionality.
- Collaborated in a 5-member team to implement real-time messaging and JWT authentication; contributed to the full stack application and the project won 3rd place in the hackathon.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C#, Java, SQL, HTML5/CSS3
Backend & APIs: .NET, ASP.NET, Node.js, Express.js, REST APIs, C# Plugins
Frontend: React.js, Redux, Component-Based Architecture, Responsive Design, State Management
Databases & Security: SQL Server, MongoDB, Query Optimization, OAuth, SSO, RBAC, Encryption
Enterprise Platforms: Microsoft Dynamics 365, Dynamics F&O, Box, OpenText Documentum/D2, xECM, OTDS, Intelligent Capture
Deployment & Tools: Git/GitHub, IIS, Windows Task Scheduler, Postman, VMware, Jira Service Management, SharePoint
Engineering Practices: Functional & Integration Testing, Debugging, Technical Documentation, Production Support, Agile/Scrum

EDUCATION

Full Stack Web Development — Masai School, Bangalore | 2023 – 2024
B.Tech in Mechanical Engineering — Nadimpalli Satyanarayana Raju Institute of Technology | 2019 – 2022
